

Our organization is an awareness group that aims to educate the public about prescription drugs, over-the-counter medications, and medical devices that have the potential to cause patients serious harm.

Our website is continually updated with drug recall news, recent FDA approvals, drug interactions, side effects, and current developments in the medical field.

We have a variety of helpful health information for senior men and women on our page at www.drugwatch.com/health/seniors/. This includes information on drugs and devices, healthy aging tips, and general health information.

With Flu season right around the corner, I thought you might also be interested in our Flu Vaccine guide that can be found at: www.drugwatch.com/vaccines/flu/

I believe that our Senior Health Guide would be a helpful addition to your site and would be beneficial to you and your readers. I would love to hear what you think!

Best Regards,
